ABOUT

I am an experienced Frontend Developer over 4 years of expertise in creating responsive and user-friendly web applications. I specialize in HTML, CSS, JavaScript, React.js and Next.js have a proven track record of delivering high-quality projects on time. I excel at collaborating with cross-functional teams to design and implement innovative solutions that enhance user experience.

PROFESSIONAL EXPERIENCE

Adcropper, Istanbul/Remote - January 2022 – September 2025
Frontend Developer

Web Applications:
Actively contributed to the frontend development of various web applications and developed modern, user-friendly interfaces. (Contributed to the frontend development of , betecco.com and platform.adcropper.com)

Landing Pages:
I develop pixel-perfect, animated landing pages that are browser-friendly and suitable for responsive design. (adcropper.com, alunafi.com). I develop wordpress template (blog.alunafi.com)

Responsive Design:
Designed and implemented high-performance, responsive designs compatible with both mobile and desktop devices, ensuring seamless user experiences across all screen sizes.

SEO Optimization:
Applied SEO best practices to web applications, including the proper use of meta tags, semantic HTML, optimized image sizes, and clean URL structures, enhancing site visibility and search engine rankings.

Performance Optimization:
Optimized frontend performance by implementing techniques such as lazy loading, image compression, code splitting, and minification of CSS/JavaScript files, resulting in faster loading times and a more responsive user experience.

Email Development:
Coded professional email templates that are fully compatible with all major browsers, ensuring that the design and functionality remain consistent across different platforms and devices.

JavaScript Debugging:
Performed bug fixing and optimized the performance of JavaScript-based applications, resolving issues and enhancing the efficiency of client-side interactions.

Digital Advertising Banners:
Designed and developed digital advertising banners tailored to various platforms and campaigns, ensuring they were optimized for both visual appeal and fast loading times, contributing to increased ad performance and engagement.

Technologies Used:
Frontend: HTML5, CSS3, JavaScript (ES6+), Jquery ,React.js, Context API, Redux Toolkit, React Router, Sass, Bootsrap, Tailwind.css, Material UI
Tools: Git, Webpack, npm, vite.js, Figma, Photoshop, Bannerflow

Freelance Frontend Developer - 2022 – Present

Website Development:
Developed a fully responsive website from scratch, ensuring it adapts seamlessly to various screen sizes and devices, providing an optimal user experience. (muvezzi.com)

Frontend Development:
Contributed to the frontend development of the website using HTML5, CSS3, JavaScript, and React, implementing modern web design practices and a clean, intuitive user interface.

Component-based Architecture:
Created reusable and modular components in React.js, focusing on maintainability and efficiency across the site.

Bug Fixing & Optimization:
Identified and fixed bugs to improve site performance and stability. Conducted regular code reviews to ensure high-quality deliverables and optimal functionality.

SEO & Performance Optimization:
Applied SEO best practices to improve site visibility, and optimized performance through techniques like image compression, minifying CSS/JS files, and leveraging caching mechanisms.
